Apex 3D TF

Laser 3D printing technology
Perfectly reshapes the trabecular structure

Apex TPS

Vacuum plasma titanium spraying technology
provides excellent bone ingrowth foundation

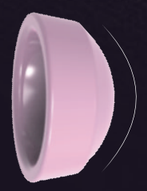

Imported high crosslinked polyethylene liner
Reduce wear by 85%
High edge design reduces
impact wear, and increases
mobility

The Hole Plug of the same
specification can effectively prevent
polyethylene debris from entering
the acetabulum

Matched with various types of liners
(XPE/ceramic/metal)
12 anti-rotation protrusions ensure double
locking of the polyethylene liner
Anti-rotation top hole design ensures
stable installation of the acetabular cup

Fourth generation of
ceramic liner minimize wear

Various materials and specifications of
femoral head can meet
different surgical needs

Implants

Apex Acetabular System
